Programming Environments

Beginner

.NET Core TypeScript
JavaScript Node.JS Vue
React Rust

Operating Systems

Intermediate

Linux Desktops
Linux Servers (Debian-based)
Windows desktops, 9x through 10
Android system management

Tools

Beginner

AWS Cloud services
Docker

Languages

English (Native speaker)

Summary

Computer Science university student seeking part-time remote employment opportunities in any location, that combine my interest in technology with a strong military work ethic. Avid computer hobbyist, with a strong knowledge base covering Windows, Linux and set-up of a variety of server applications.

Experience

Edict Systems

Software Programmer

12/2017 - 12/2020

Develop and maintain custom EDI document editor implementations for each of Edict's trading partners

- Trained two new employees in developing file transformation pipelines
- Made an internal Markdown documentation file viewer and editor in JavaScript and Electron, giving a centralized way to share documentation and notes
- Partially made an internal document parser using .NET Core
- Made an internal template generator for scaffolding C# projects, saving dev time on templating new projects
- Wrote a Google Chrome extension in TypeScript to fully automate a billboard display
- Awarded Employee of the Quarter for Q1 2020

West Virginia Army National Guard

15T - UH-60 Helicopter Repairer

09/2007 - 09/2017

Performed the inspection, servicing, installation, and removal of components from H-60 helicopters used in tactical air transport, air assault, and medevac operations, with experience in both flight line and heavy maintenance environments

- Supervised and trained more than a dozen junior mechanics in helicopter maintenance and repair, general cleaning, and related paperwork
- Awarded three Army Achievement Medals for performance
- Completed a three-month, full-time assignment as a mechanic with the National Guard's counter-drug program, with responsibility for performing daily inspections and maintenance on UH-72 and OH-58 aircraft on three bases across West Virginia
- Have 150 accident-free flight hours as a UH-60 Crew Chief, with responsibility for safety of cargo and passengers, helicopter mechanical status issues, and assisting pilots in general flight duties

Projects

Private Cloud Server

I manage a Debian Linux Cloud VM that provides me with private file sync, file duplication, file sharing, online document editing, contact sync, calendar sync, and IRC.
